

justitia.swiss – API Changelog – V2.19.2

Version: - 11

Projektphase:

Erstellungs-Datum: 05.08.2026

Autor: justitia.swiss support

Klassifizierung: public

Status: Plattform Release 1.18

Table of Contents

1 Version [2.19.2]	4
1.1 Breaking Changes	4
1.2 Added	4
1.3 Deprecated	4
1.4 Migration Notes	4

All notable changes to the public API of justitia.swiss are documented in this file.

The format is based on [Keep a Changelog] (<https://keepachangelog.com/en/1.1.0/>)

1 Version [2.19.2]

Plattform Release 1.18:

- On TRAIN: 05.08.26
- On PROD: tbd

1.1 Breaking Changes

- No breaking changes

1.2 Added

- **Standardization of Profile ID Naming**

- Introduced explicit `creatorProfileId` and `recipientProfileId` properties across all transmission-related resources to establish a consistent naming with `...Id` pattern (e.g. `recipientProfileId` instead of `recipientProfile`).

Impacted DTOs: `TransmissionDto`, `SharingTransmissionDto`,

`CreateSharingTransmissionDto`, `CreateAttachmentTransmissionRequestDto`,
`UpdateSharingTransmissionDto`, `UpdateAttachmentTransmissionRequestDto`

- **Reception Details for Attachment Transmissions:**

- Added the `received` property (`ReceptionDetailDto` with the boolean field `"isAutomatic"`) to `AttachmentTransmissionDto` to indicate whether a reception was automatic. It allows to determine if a DELIVERY was received by the receiver or automatically after the 7 days reception period.

1.3 Deprecated

- **Legacy Profile ID Fields:**

- Deprecated `creatorProfile` and `recipientProfile` across transmission DTOs in favor of `creatorProfileId` and `recipientProfileId`. They will be removed in the next major release.

1.4 Migration Notes

- **Profile ID Fields:** Transition payload creation and reading logic from old naming pattern (e.g. `creatorProfile` / `recipientProfile`) to the new pattern (e.g. `creatorProfileId` / `recipientProfileId`). If both deprecated and new fields are provided during creation/update, the new (e.g. `recipientProfileId`) takes precedence.
